Profile

Data and AI professional building production analytics systems, workforce forecasts, and applied machine learning tools. Experience spans call-center operations, neuroscience research, government and publicly evaluated sports models.

EXPERIENCE

Data & AI Engineer 2026 – Present
Group U
- Developed account-level forecasts covering approximately 48,000 weekly calls, incorporating historical trends, seasonality, and holidays to guide staffing decisions.
- Turned forecasts into headcount targets by modeling missed-call rate against staffing, and built the hiring scenarios used in staffing decisions.
- Ran root-cause analyses on forecast misses and volume drops, and turned the findings into model fixes and summaries for leadership.
- Built AI call-quality scoring with AssemblyAI and Claude, and measured its error, bias and agreement against supervisor grades.
- Automated daily and weekly KPI reporting for executives and supervisors using SQL on PostgreSQL and Azure SQL.

Data Science Research Volunteer 07/2025 – 03/2026
Salk Institute for Biological Studies La Jolla, CA
- Built and corrected behavioral video datasets for a SLEAP pose-estimation model used in dominance research.
- Cross-validated mouse-displacement classifications to identify reliable outputs for downstream analysis.

Data Analyst 01/2025 – 07/2025
Tijuana City Council Tijuana, MX
- Built an air-gapped beneficiary dashboard for elected officials; optimized SQL queries to cut lookup time by 22%.
- Automated municipal reporting pipelines, reducing manual data handling by 30%.

Data Analyst 2022 – 2024
Executive Offices San Diego, CA
- Built SQL reports for billing, occupancy, and fiscal activity; corrected duplicate records and entry errors, reducing data errors by 26%.

PROJECTS

Sports Forecasting Models · renenunez.dev
- MLB: Built WAR forecasts that cut next-season RMSE ~10% vs. a prior-fWAR baseline, winning all 28 season and role backtests (2015-2026).
- MLB: Built Statcast talent grades that out-predicted Marcel and xwOBA on next-season run value in a 2026 holdout.
- NFL: Built a QB rating that out-predicted DAKOTA and EPA/play on a 2025 holdout (0.47 vs. 0.33 and 0.38 rank correlation).
- Published live MLB, NFL, CFB, and NHL forecasts on a Next.js/Supabase site with scheduled Python pipelines.

TECHNICAL SKILLS

Tech Stack
Python, SQL, TypeScript, JavaScript, R, PostgreSQL, Azure SQL, Next.js, Prisma, Supabase

Tools & Tech
Git, GitHub Actions, Docker, Linux, Power BI, Tableau, Claude Code, Codex

Data & ML
XGBoost, Scikit-learn, PyMC, TensorFlow, PyTorch, Pandas, Polars, NumPy, Data Pipelines, ETL, Time Series Analysis, Forecasting, NumPyro, JAX, ArviZ

Languages
English (C2), Spanish (Native), Italian (A1)

EDUCATION

B.S. Computer Science 2020 – 2025
CETYS Universidad Tijuana, Mexico
EGEL-CENEVAL · Sobresaliente (Top Distinction) — Intelligent Computing

Università di Bergamo, Italy 01/2023 – 07/2023
Foreign Specialization Program, Focus on Data Science and Machine Learning
